Project:- WEST DORSET DISTRICT COUNCIL STRATEGIC FLOOD RISK ASSESSMENT LEVEL 2

The modelled surface water flood risk is shown here to be generalised, and should not be used to assess the risk to specific buildings. The bandings of more-intermediate-risk have been applied nationally and any particular area may contain no "more" bandings but this does not equate to an absence in variation of surface water flood risk across that area. For guidance on specific use of the information contact your local Environment Agency office on 08706 506506.

Title B1:- SURFACE WATER FLOODING Map 2 - Beaminster

All point source information shown on this map is located as close as possible to the record of flooding. The point source icons do not reflect flood extent. Flood extent may be smaller or greater than depicted by these icons.
